

Spatial-Aggregate (4 km) Three-Level U-Net

Three downsamplings | 20 m dense SIF prediction | 485,041 trainable parameters

Input Composition (19 channels)

8 spectral/biophysical | 9 cover fractions | month sin/cos

Conv block

3x3 Conv

GroupNorm (8)

SiLU

x2

Decoder stage

2x2 transposed conv

Concatenate Skip
